FOR PURIFYING THE BLOOD,
And for the speedy cure of the following complaints:
Scrofula and Scrofulous Affections, such
as Tumors, Ulcers, Sores, Eruptions,
Pliniples, Pustules, Blotches, Boils,
Blains, and all Skin Discusse.

J. C. Ayma & Co. Gents: I feel it my duty to acknowledge what your Sarsaparilla has done for me,
Having inherited a Scrofulous infection, I have
suffered from it in various ways for years. Sometimes it burst out in Ulcers on my hands and arms;
sometimes it turned inward and distressed me at the
stomach. Two years ago it broke out on my head
mass painful and louthsome beyond description. It
ried many medicines and several physicians, but
without much relief from anything. In fact, the
disorder grew worse. At length I was rejoiced to
read in the Gospel Messenger that you had prepared
an afterative (Sarsaparilla), for I knew from your
reputation that anything you made must be good.
I sent to Cincinnati and got it, and used it till it
cured me. I took it, as you advise, in small doses of
a teaspoonful over a month, and used almost three
bottles. New and healthy skin soon began to form
under the scab, which after a while fell of. My
skin is now clear, and I know by my feelings that
the disease has gone from my system. You can well
believe that I feel what I am saying when I tell you,
that I hold you to be one of the appectes of the age,
and remain ever gratefully.

"I most cheerfully comply with the request of your agent in saying I have found your Sarsaparilla a most excellent alterative in the numerous complaints by Winch we thinnoy with "a Veneaux litter expecially in Female Diseases of the Serchileus diathesis. I have cured many inveterate cases of Leucorrhea by it, and some where the complaint was caused by uteration of the uterus. The uteration itself was soon cured. Nothing within my knowledge equalsit for these female derangements."

Edward S. Marrow, of Newbury, Ala, writes:
"A dangerous ovarian tumor on one of the females we could employ, has at length been completely cured by your Extract of Savsaparilla. Our physician thought nothing but extirpation could afford relief, but he advised the trial of your Sarsaparilla as the last resert before cuiting, and it proved effectual. After the disease remains. Syphilis and Mercurial Disease.

New Orleans, 25th August, 1859.

Dr. J. C. Ayen: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have realized with your Sarsuparilla. I have cured with it, in my practice, most of the complaints for which it is recommended, and have found its effects truly wonderful in the cure of renered and Mercurial Disease. One of my particular hands of the complaint of the complaint of the complaint of the complaint of the cure of your Sarsuparilla example the complaint of the cure of your Sarsuparilla example the complaint of the cure of your Sarsuparilla steadily taken cured him in five weeks. Another was attacked by secondary symptoms in his nose, and the ulceration had exten away a considerable part of it, so that I believe the distribution of the considerable part of it, so that I believe the distribution of your Sarsaparilla, the ulcers healed, and he is well again, not of course without some disfiguration to his fince. A woman who had been treated for the same disorder by mercury was suffering from this poison in her bones. They had become so sensitive to the weather that on a damp day she suffered excruciating pain in her joints and bones. She, too, was cured entirely by your Sarsaparilla in a few weeks. I know from its formula, which your agent gave me, that this Preparation from your laboratory must be a great remedy; consequently, these truly remarkable results with it have not surprised me.

English Summary. The papers are full of the coming elections. Before Parliament was prorogued members of the old House of Commons and candidates for scats in the reformed House have been busy addressing and conciliating old constituencies or selecting a new field for their political talents. The general impression seems to be that one of the effects of the Reform Bill will be to increase the expense of elections to an enormous extent. No step has been taken by the House of Commons to lessen the legitimate expense of elections. Every suggestion in that direction was at once hooted down by the reigning plutocracy on both sides of the House. The constituencies in the manufacturing cities are multiplied threefold or fourfold, and an election for one of the larger county towns it is said, will cost three times as much as formerly. This tends to bring the old men prominently forward; it suits both Liberals and Tories to keep up the barriers of the house as madical possible. The agents who manage the elections are endeavoring to push the old men in by hurrying matters so much that the masses, to whom the franchise has been brought down, will not realize until too late the great political changes that have spread over the land. Hurry seems to be the watchword of both sides. If there is to be a dissolution, say the old hands, let us hurry through the business. The Irish Reform Bill is pronounced by the Liberal organs to be a complete failure; it has been burried to such an extent that the result is no apparent reform for Ireland at present. However the chances seem to be altogether in favor of a heavy majority for the Liberal party in the reformed House. The Irish Church question is too much relied upon by the Tory party, who are putting the clergy too visibly in the forefront of the battle, and by this step have roused the Nonconformists in the counties to special exertion. Serious apprehensions are apparently entertained by the Disraelites that the English Church is to be the next point day, the New York Herald speaks of attack. That section of the Liberals who do not wish for any separation say, on the other hand, that Gladstone will not interfere with Church and State.-Outside of election matters education occupies a prominent place in the discussions of the topics of the day. Mr Lowe, who seeks to represent the University of London, has been of late considered an authority upon educational matters. He has now come out as the champion of parents, and in his speech on Eton, when the report of the Public Sekools Commission came up for discussion in Parliament is reported to have said that it was to the parents of the pupils and not to any governing body appointed by the House, that they must look for modernizing and making the schools better adaptcational reformers accuse Mr Lowe of indifference, and too great a desire to let things be as they are. There is

ed to the present day; the true edu. not sufficient unsufficty upon the nost important of questions to ensure subject of Great Britain who became a the passing of a good educational bill at present, and it would seem that, from difficulties remaining in the way of practical men getting into the house, the feeling of the new Parliament will for some time st all events be against thorough and sound reformation.-The great scandals of the sporting world are likely to be the subject of judicial inquiry. It was announced that the Marquis of Hastings was not "on the square" as regards the running of the Lady Elizabeth and the scratching of the Earl for the late Derby. Admiral Rous, of the Jockey Club, publishes a letter in the Times denying a report which had been circulated, that he thought Lady Elizabeth had been poisoned and asserts that she had been unable to gallop for a year. She had, says the Admiral, broken down from overtraining, and her owner had been shamefully deceived by the trainers. the Messrs. Day, of Danebury; he also exonerates the Marquis from the responsibility of scratching the Earl, saying that it had been done by one of those creditors who had the nominal owner in his power. The Marquis of Hastings is indignant with the Admiral, and characterizes his letters as a tissue of misrepresentations; Messrs Day have gone further, and have

chael, of Servia, has occupied the attention of Europe, and opinion is divided as to whether the assassination arose from political motives or from motives of revenge, and although several arrests have been made, the latter opinion is supported by the fact of the Radovanoviches, a father and two sons, who fired the fatal shots, having a fancied grievance against the Prince as well as against his cousin, with whom the father had been in litigam tion. The cousin Anka Konstantinevitch, and her young daughter were murdered at the same time. The Princess Anka seems to have instigated the separation of the Prince from his wife, from whom he medirted obtaining a divorce. A cousin of Prince Michael's has been chosen by the provisional government to succeed him. This young Prince, Milano by name, is only fourteen; the murdered Prince was the youngest son of Milosch, whom he succeeded in 1860; he had previously, in 1839, taken the government into his hands upon the death of his elder brother Milano, who had succeeded to his father after his abdication, and died in 1839. A civil war at that time resulted in the defeat of Michael, who was an exile until the restoration of his father in 1858.

says the themometer has stood high up for the last few days, from 95° to 101° in the shade.

The time to Salt Lake by stage is now four days.

The Statesman of the 23d has th following: We learn by passengers from Idaho City last evening that the warehouse of Powell & Co., merchants, was entered on Thursday night and a safe, weighing 1,540 pounds, taken therefron and carried several hundred yards to a secluded spot, and broken open with sledge hammer and chisel and between \$5,000 and \$6,000 abstracted. The rob. bers are supposed to be Chinamen. Although three watchmen were on duty, they were not caught up to the time the stage started.

THE PEN AND THE SWORD IN ENGLAND. In noticing the general progress and power of liberal ideas in England at the present thus:-

The Duke of Cambridge, Commander. in-Ohief of the English army, presided at the annual dinner in aid of the Newspaper Press Fund in London, on the 6th July, in presence of a crowded assemblage made up for the most part of members of the military profession. "Bull Run" Russell, with two or three others, were the the only newspaper writers in the room. His Royal Highness, the head of the army, saw that this anusual display required explanation, and he proceeded to give it in the following words:—"Professionally, I am placed at the head of one of the great services of the State, not connected with any politics, and who may be supposed not to take that great interest in the institutions of the country which every citizen of a State ought to take. Now, I am come here this evento prove, as far as lies in my power, that the army and the other institutions do take interest in these matters. The fact of the head of one of these professions coming here to night is an earnest and visible proof that such a view is no mere matter of phrases and words, but is a fact and a reality." "When we call to mind the firm barrier

who wielded the pen, as well as from the influence of newspapers, from the days of Woodfall to the time of the late Joseph Hume and Richard Cobden, we must certainly accept this graceful capitulation of the sword to the pen as a most remarkable evidence of the solid progress of free thought towards the realization of municipal amalgamation and a universal suf-frage under the Queen. We trust that General Grant will make a note of the words of the Duke of Cambridge."

VIRGINIA, July 27-Last evening the sheriff was attempting to arrest Peter Hill, known as Russian Pete, for a robbery committed at Silver City. Hilf ran away and took refuge in the old North Potosi tunnel, Hill shot and instantly killed Williams, a blacksmsth. Afterwards, when he retired into the tunnel, he committed suicide by shooting himself through the head.

Holloway's Ointment,—A fair trial is all that is asked to prove the sterling and superior merits of this Ointment, and to demonstrate how much more successful it is in curing old ulcers, inveterate sores, and disfiguring cruptions than any other application. When properly used it lessens the inflammation, which invades parts adjacent to the wound or ulcer, whereby much local pain is immediately assuaged, and, in the course of an hour or two, satisfactory results invariably follows, which will steadily advance to a thorough and permanent cure. This treatment, so much at variance with the old-fashioned views of cauterizing, blistering, leesting, tec, has by common consent been p nounced to the greatest blessing to persons thus afflicted.

Summer Weather.

The hot, sultry month of August is now apon us. The season when sickness is more atal than at any other time. When the body is relaxed, and nature can do least to receperate its exhausted strength. At this time we require to guard, with more than usual care, against the attacks of the great enemy-disease-by fortifying the system with HOSTET-TER'S STOMACH BITTERS-the most wonderful tonic in the world. A tonic endorsed as a pure, harmless and effective FAMILY MEDICINE by millions of human beings who have thoroughly tested it and found immediate relief. By its aid the appetite is at once increased; digestion recovers its healthy tone; the vital forces are invigorated, and new tone; the vital forces are invigorates, and new life infused into the system. The weak, debili-tated and nervous victims awake to a feeling of true enjoyment, and life, once a burthen, becomes a source of pleasure.

Beware of the pernicious alcholic prepara-tions, purporting to be tonics and stomachics, puffed up daily in the newspapers! Let them alone!

HOSTETTER'S STOMACH BITTERS is the one PURE and RELIABLE TONIC and INVIG-ORATOR, and can be procured in every city, town and village in the country. HOSTETTER'S BITTERS have a permanent

reputation, which is rapidly increasing as the years go by. All others are but mushrooms of the hour, and die off as quickly as they spring into existence.

None but a physican knows how much a reliable alterative is needed by the people. On all sides of us, in all communities everywhere there are multitudes that suffer from complaints that nothing but an alterative cures. Hence a great many of them have been made and put abroad with the assurance of being offectual. But they fail to accomplish the cures they promise because they have not the intrinsic virtues they claim. In this state of the case, Dr. J. C. Ayer & Co., of Lowell, have supplied us with a compound Extract of Sarsaparilla, which does prove to be the long desired remedy. Its peculiar difference from other kindred preparations in market is that it cures the diseases for which it is recommended, while they do not. We are assured of this fact by more than one of our intelligen Physicians in this neighborhood and have the further evidence of our own experience of truth .- [Tennessee Farmer, Nashville

The Street Committee was granted further time to report as to the construction of the

new culvert crossing Blanchard street. Councillor Gibbs moved that the rental for the landing at Johnson street ferry be put up at public auction and let for the balance of the Municipal year; and that the Street Committee be empowered to report at the next meeting of the Council the necessary expense of defining and improving the city landings. On motion carried.

The Council then adjourned until Tuesday next, unless sooner convened by the Mayor.

GETTING JUST AT LAST .- The San France cisco Aulletin of 24th ulto, in a short notice of the wreck of the Suwanee, adds, ' the news received last evening from Cariboo reports everything in a flourishing condition. Nearly all the claims are paying well, and prospects are very encouraging.' A statement like that made by the Bulletin [in San Francisco is worth more than all the politic distance required a few years ago. cal, diatribes that could be written in a month. Improvement in our material interests through renewed immigration, which uch statements will assist, would soon cure our political ills and grievances.

Oregon

We take the following from a Portland paper of the 30th. Our own authorities should take warning :

FROM SAN FRANCISCO .- Chas Ball, Esq, called on us yesterday. He arrived on Tues. day from San Francisco, overland. He informs us that the small pox was prevailing to a much greater extent than is reported by the papers of that city. Many people are leaving the place for the time being and going into the country to escape the infection. He states on the authority of a physician of that city, that if the people knew the full extent of the disease in their midst they would be horrified. Owing to the constant communication between that place and this is would be the highest wisdom on our part to adopt stringent sanitary measures to prevent the introduction of the loathsome pestilence here. Our city is not safe from infection as long as we are without a system of quarantine regulations.

The following is a synopsis of the sanitary egulations of San Francisco:

Ist, It is the duty of each physician to eport to the Board of Health in writing, every patient laboring under Asiatic Cholera, or Small Pox, within twenty-four hours after it shall have occurred.

2d, Every person keeping a boarding or odging houses hall report each case of these diseases occurring on his premises, to said Board, within the same time, and also each occurring, under a penalty of \$500 fine or ten days imprisonment.

THE USSJAMESTOWN .- The following particulars will be read with interest of the old ship, recently staying in this harbor. Sho has quite an historic character:

OUT OF COMMISSION - Lieutenant Commander Dougal, of the U S sloop Jamestown has hauted down his Higgs and received teave of absence. The officers are ordered East, the men paid off and the ship laid up in ordinary at Mare Island. This vessel once thought-that was the days of Parrot guns, ironclads and monitors-one of the crack ships of the American Navy, is superannuated. She may, unless the United States become shertly entangled in another war, rot at Mare Island, or might perhaps be used for a store or hospital hulk, or even as a prison; but the ship that carried America's welcom gift of bread to Ireland twenty years ago, that has borne the fire of the Confederate guns, that became horribly famous last year by her crew being stricken with a deadly fever, and that lastly has taken part in the hurried ceremony of receiving the territory of Alaska from the Russians, will probably never go to sea again. She has made her last cruise, and her last voyage from Royal road Vancouver Island, to the Golden Gate, is the quickest on record ever made by a sailing vessel. Her surgeon, Dr Bloodgood, has been ordered to the Lackawanna, now on the coast of Mexico.

FROM THE MAINLAND-The steamer Fly arrived at 11 o'clock last night. Twentyfive passengers and \$100,000 in dust came down, the greater portion of the treasure for the banks. Mr Watson, Bank B C. Messrs U Nelson, Armstrong, Cunningham, were amongst the passengers. The news from the mines continues encousaging. On the 23d a quarrel arose between two parties on Mousquito gulch, in regard to a water ditch, resulting in Jessie Pierce being shot through the band with a revolver by James Knight Knight was arrested and placed under \$5000 bonds, examined before the Magistrate and committed for trial, which trial was to come off on the 29th. Rain fell an the 27th, affording a plentiful supply of water for mining purposes. On the morning of the 24th the California company discovered that their sluice box had been robbed. A Chinaman was arrested on suspicion. On the 26th the demohor of the Sheepskin company was robbed while the men where at supper. The Minnehaha company continues at the head of the claims, paying largely; 365 oz. of gold was washed out the last week. A new creek prospecting well is reported.

CRICKET .- Communications have been received from the San Francisco cricketers, of stating that Mr G Stelly had performed the ficially and otherwise, proposing an international match with a Victoria Eleven. to receive the sam of \$13550 as per thing in the matter this year for various reaagreement. On motion referred to Finance | sons, but chiefly because the ground on Bea con Hill enclosed by them, will not be in

proper order before the ensuing season. In the meantime the San Francisco players should exert themselves with the steamship company to see what can be done as to getting the fare reduced in the event of a match taking place-tor much will depend upon that point. Now that cricketing has become fashionable and popular in California, this perhaps might be done. Amongst the Victoria players residing below, we see the name of Mr. Powell, of the Bank of British

The Bank of New South Wales at Sof-Columbia, honorably mentioned in some of the late matches.

PLEASANT TRAVELING .- From a gentleman of this city, just returned from a visit to Washoe, we learn the particulars of the the day's ride between Virginia and San Francisco, a distance of 282 miles. To reach the terminus on the east side of the Sierra Nevada, 22 miles, stages are still used which leave Virginia at 3 in the morning; the cars arrive in Sacramento at 1; and the steamboats thence make San Francisco generally about 10 at night. What a difference this to the four days terrible traveling the same

GROUNDLESS REPORT.-A report was in circulation yesterday afternoon that a case of cholera has occurred in this city, resulting fatally. The report could not be traced to any reliable source and was without doubt altogether groundless. Summer com-

WE HAVE been requested to state by competent parties that the man Eli Foster, referred to last week in the Olympia Standard as being under arrest for an unnatural offence, is not an ordained minister of the Methodist Church; and that, in fact, he has not held any official connection with that or any other church for several years. He has been travelling for subscribers to a book called the Far West, which he intended publishing.

BATHING .- We have heard complaints also, in regard to the habit of bathing, by both sexes at unseasonable hours, in other exposed portions of the harbor, as well as the Gorge. We are pretty sure a newspaper notice will suffice to amend the objectionable practice.

A DEEF WELL .- An Artesian well at St. Louis, America, is being bored by the county and has reached a depth of 3,147 feet without striking water. This is so far the deepest well in the world, and has taken twentysix months to out it. The work still continues.

THE schooner Crosby, Captain Perkins, arrived from Portland yesterday morning with six tons of produce freight, consigned to Wallace & Stewart. She brought 65 sacks of wheat and 636 quarter sacks flour. She leaves for Port Townsend to-day to deliver the remainder of her cargo.

NAVAL--H M S Pylades left Valparaiso on the 23rd June for this port. News has been received of the death of the Paymaster and first Lieutenant of the same. The former vacancy will be filled from this station. The Charybdis from Australia is also due at this port. REV THOS SOMERVILLE.-This gentleman

we understand, has received an invitation from his people in Cariboo to pay them a والاعداد والمروح والمراكد والأوالا مجاوية والما will leave for the interior about the 21st of this month, and will be absent a month. PRESENTERIAN CHURCH.-Ground was bros

ken this week preparatory to laying the foundation of this church, at the intersection of Gordon and Courtenay streets. The build. ing when completed, judging from the plans, will be an ornament to the city. ANOTHER REFORM .- Among the questions. it is said, most likely to come before the

next Parliament, with a good prospect of being carried, is that of purchasing commissions in the Army. A thorough change, it is expected, will be made. Discharged-The man Jenner, who has been on bail on the alleged charge of

incendiarism in connection with the recent fire at the distillery, was yesterday discharged by the Stipendiary Magistrate, no further evidence appearing. GROUSE CREEK FLUME.—By advices just received from Cariboo, members of the com-

pany in this city are informed their ground paid 1,000 ounces in three weeks' work, and is still paying well. Why is a mad bull an animal of convivial

disposition? Because he offers a horn to very one he meets. LIME .- The sloop Thornton, from Orcas

COAL TAR

[Extractfrom the Lancet, Dec. 2 1866]

Lag. Carbons Detreagns—We are very value of .ew reme. ies, and it was in a spir that we tried the iq. carbons detergen the sented to be a concentrated alcoholic solution, the stituents of coal lar, and to contain all the dents of the tar, to wi, benziue, napthalia acid. The addition of water, with agitat durable emulsion, in which the tar remain fine suspension, almost equivalent to solution, our therapeutical experience of the oreparation is very satisfactory indeed. In our hands it has been a most effective agent in the case of various skin diseases, especially of the obronic exematous class; and on-case of psorfasis which had resisted all other kinds of treatment speeding of well under the application of the liq. carbonis detir gens. We esteen it a very valuable addition to our lide profession, and in various others, such as feed ulces, etc., the preparation is put into the form of scap.
